

## 100 Putney Common: IP Intercom & Door Entry

The former Putney Hospital site in London has been transformed into a selection of 24 luxury apartments secured by the 2N range of Helios I.P. Intercom solutions.

Location: **Putney Common, London**  
Client: **Durkan**  
Installer: **Imaginise**

### Client:

The site of the former Putney Hospital in London has recently been transformed into a selection of 24 luxury apartments and adjacent new primary school - all of which is secured using the 2N range of Helios I.P. Intercom solutions.

Set on the very edge of Putney and overlooking the peaceful common ground just minutes away from Central London, **100 Putney Common** is targeted at the luxury market with a high-end finish combining style and the latest integrated technologies as standard specification.

### System Requirements:

With Control4 home automation already specified into each apartment, project developers **Durkan** approached **Imaginise** to recommend a secure Intercom and Door Entry System which would seamlessly integrate with the smart home control system.

As Control4 and 2N are approved interoperable systems, the **2N Helios IP range of Intercoms** was introduced to the client, who were impressed with the style and usability of the system, as well as it's ability to easily integrate into the Control4 home automation control system.

Bringing technology to life.

# 100 Putney Common: IP Intercom & Door Entry

The former Putney Hospital site in London has been transformed into a selection of 24 luxury apartments secured by the 2N range of Helios I.P. Intercom solutions.

## The Solution:

Project AV integrators - **Imaginise** - worked in partnership with CIE's team of in-house system architects to specify and design an integrated Intercom and Door Entry System using 2N's latest **Verso Modular Intercoms** and **Indoor Touch** touchscreen interfaces.

Each of the 24 apartments at 100 Putney Common is fitted with the 2N luxury Indoor Touch device which allows high definition video and audio communication with any visitors to the site who call the apartment via the outdoor intercom devices.

These stylish touchscreen intercom interfaces enable residents to quickly allow access to visitors simply via the touch of a button on the screen.

Externally the system uses **Helios IP Verso Intercoms** - 2N's high-end modular solution which combines style with versatility. Positioned at the site main gate, the pedestrian gate and the apartment complex front door - the Verso Intercom devices feature HD colour camera, microphone and speaker for direct communication with residents, together with contactless RFID Module (for keyfob/smart card access control) and 2N's brand new Verso touchscreen Digital Phonebook Keypad Module

which can be fully programmed with resident names and apartment numbers, etc, allowing visitors to easily search and dial the correct residence.

The Putney Common security system also features 2N's new Contactless Access Units which provide fast and easy keyfob/smartcard entry to the underground car park and communal terraces.

## Product:

- 25 x 2N Indoor Touch Touchscreen Intercom Device
- 3 x 2N 9155101C IP Verso Modular Door Intercom with camera
- 3 x 2N 9155040 IP Verso Smart Card RFID Reader Module
- 3 x 2N 9155036 Digital Phone Book & Keypad Module
- 5 x 2N 916010 Contactless Access Unit
- 2N Access Commander system administration interface

## Products used in this project

2N - Indoor Touch Touchscreen Intercom Device

2N - IP Verso Modular Door Intercom with Camera

2N - 9155036 Digital Phone Book & Keypad Module

2N - 916010 Contactless Access Unit

## Let the CIE expert team help with your next AV project

CIE AV Solutions is one of the UK's leading value-added distributors, supporting our customers and their clients with product specification, system design and product supply for AV, intercom and electronics. Our in-house AV experts would be happy to advise on your next project or simply discuss your needs. Contact the CIE team on
