

Akuvox Smart IP Intercoms

Brooklyn Apartments - Akuvox Smart IP Intercoms

8 buildings with 60+ Apartments in Brooklyn, New York use Akuvox Smart IP Intercoms for security solution.

Location: Brooklyn, New York, USA

Client: Owner of Brighton Beach Avenue Apartments

Client:

The owner of a residential community located in Brighton Beach Avenue, Brooklyn, New York has a total of 8 buildings with more than 60 apartments in each building. The company focuses on the delivery of operating efficiencies and improved tenant relationships in order to maximise value for their clients.

System Requirements:

The 8 buildings with more than 60 apartments in each building had an existing analog intercom system coupled with RFID access control system, however it was aging and presented a few problem, such as data loss in the long-distance transmission in such a big community, audio-only communication and poor expandability.

The Solution:

The owner decided to go with Akuvox SmartPlus smart cloud-based intercom solution. The Akuvox R29C IP Intercom 7" Android doorphone was installed in the main entrance of each building. The Akuvox IT83A 10" Android indoor monitor was installed in the living room of each apartment. The best part for the tenants is the Akuvox SmartPlus App, which offers rich intercom features on-the-go, such as two-way communication with the doorphone and remote buzz-in of visitors.

Bringing technology to life.

Brooklyn Apartments - Akuvox Smart IP Intercoms

8 buildings with 60+ Apartments in Brooklyn, New York use Akuvox Smart IP Intercoms for security solution.

The solution provides an excellent user experience. Property access management was made easy and efficient for such a big community. From a web portal, property managers can manage access permissions, audit door release logs and update tenant profiles of all buildings remotely.

For tenants, they can choose one of the multiple access control methods of the doorphone to get door entry apartment from the app, such as facial recognition, NFC and PIN code. Visitors can search tenants to visit on the 7" touch screen of the doorphone, which is as easy as using the phone book on a smartphone. Or they can simply present the time-limited QR code key created by the tenants to get door access.

Product:

- Akuvox R29C Smart IP Intercom
- Akuvox IT83A 10" Android indoor monitor
- Akuvox Smart Plus App

Products used in this project

Akuvox - R29C Smart IP Intercom with face recognition and QR code reader - Silver

Akuvox - R29CBLK Smart IP Intercom with face recognition and QR code reader - Black

Akuvox - IT83A 10" SIP Indoor Touchscreen Intercom panel with Camera, Wifi & Bluetooth - SIP PBX

Akuvox - Smart Plus App
