Akuvox SDMC (SIP Device Management Controller) software

Akuvox SDMC (SIP Device Management Controller)

Akuvox SDMC (SIP Device Management Controller) is an on-premise software system for site-wide door intercom & access control system management via the LAN.

The Akuvox SDMC platform offers property management of all SIP Door Intercom and Access Control devices on the network, as well as personnel registration, via a clear and intuitive web interface.

Main Functions:

- Personnel Registration
- Access Card (eg. RFID & NFC) and PIN Code management
- Real-time video monitoring
- Message pushing (eg. to Door Answering Panels on the system)
- Alarm handling
- Software auto provisioning
- **Access Control & Door Intercom device configuration:**

Configure and manage access rights for individuals, groups and door intercom / access control devices via the SDMC web interface.

Allows ability to specify which personnel or residents have access rights to each door, gate or entrance, during specific time/date periods.

Bringing technology to life.

Akuvox SDMC (SIP Device Management Controller)

• Multiple Device Management:

Efficient bulk management of all Akuvox door intercom, access control and answering panel devices on the system; ideally suited to large-scale projects where large numbers of end point devices need configuring.

Configurations can be backed-up, copied and attributed to multiple devices and end-point groups.

• Visitor Access Card & PIN Code Management:

Temporary, time-limited RFID / NFC cards and access PIN codes can easily be configured using SDMC, also specifying controlled access rights to limited doors or areas in the building.

• Management and Configuration via web browser:

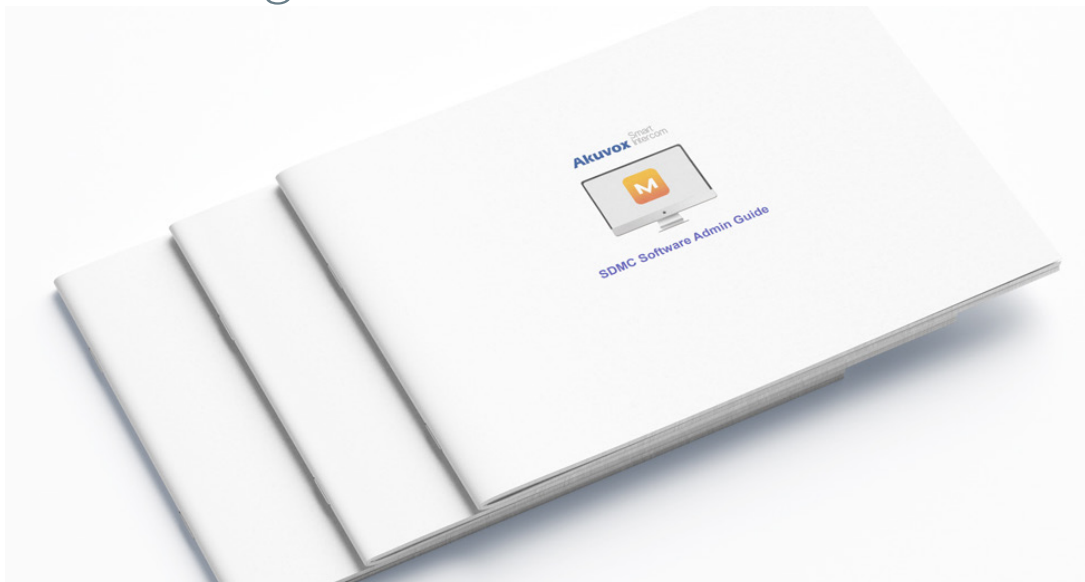

The Akuvox SDMC software allows configuration and management of all devices and users on the system via an intuitive web interface, meaning secure control from any site location with internet access.

• Multi-site Management

Where clients manage multiple sites, buildings or branches in different cities etc, Akuvox SDMC will allow admin users to oversee and manage access control rights for all buildings from the same PC web platform.
