# Introducing the 2N Certified Installer Programme

Are you ready to grow your business with 2N? Do you want more leads, expert knowledge, and exclusive endorsement from a market leader in IP access technology?

This is a unique chance for **experienced residential and commercial installers like you to become officially certified by 2N**, giving you expert training and product knowledge – whilst also allowing you to stand out from the competition and enjoy a host of sales, technical and marketing benefits.

After completing training on 2N's products and achieving certification, 2N will appoint your company as a **Certified Installer Program (CIP) partner**. There are 2 levels of partnership: **Certified and Certified Elite**, each of them with different benefits and requirements. Recertification will follow for 2 years to update the installer's know-how and good practices.

**The future of our industry is IP technology:** in connectivity, cloud services, and faster integration. So, if you want to learn from true innovators in this field and become part of a prestigious global network - **take advantage of this opportunity and evolve your business.**
