

New York 54-unit Apartment building - Akuvox Smart IP Intercoms

54-unit Apartment in Manhattan use Akuvox Smart IP Intercoms for door entry system.

Location: [Manhattan, New York, USA](#)

Client: [Rivington Properties](#)

Client:

The owner of a 54-unit apartment building 15 West 75 street of Manhattan, New York required an urgent replacement of its building entry system to help keep his residents safe and add more convenience for building entry.

System Requirements:

The 54-unit apartment building had an old intercom system at the main entrance that was broken, which put the security of the building and its residents at risk. The owner was after an advanced and affordable intercom system that meets the residents' need of higher security and more convenience for building entry.

The Solution:

The client went with the Akuvox SmartPlus smart cloud-based intercom solution. This consisted of a doorphone and mobile intercom apps as the answering units. Akuvox's R29C IP Intercom Android doorphone was installed at the main gate without a glitch. As it supported PoE, it only required one cable to finish the installation. The indoor monitors that usually come with a traditional intercom solution were replaced by Akuvox's mobile intercom app, the SmartPlus App.

Bringing technology to life.

New York 54-unit Apartment building - Akuvox Smart IP Intercoms

54-unit Apartment in Manhattan use Akuvox Smart IP Intercoms for door entry system.

Using the Akuvox SmartPlus not only stream lined building entry, but it also made the apartments stand out with a cutting-edge amenity that modern residents are looking for. The Akuvox R29C IP Intercom supports multiple door entry methods, including RF cards, PIN codes, NFC, Bluetooth and face recognition. Residents can select any option that suits their individual needs or preferences. Visitors can easily look up the apartment number to call on the 7" touch screen and enjoy excellent audio communication with the residents.
