

Quanika

COMPACT

One Platform,
Multiple Solutions,
Unlimited Possibilities.

TRANSFORMATIVE ENTERPRISE SOLUTIONS.

Quanika is transforming enterprises globally, opening pathways that orchestrate business performance and deliver on the full promise of integration, removing silos and enhancing digital and physical workspace efficiency.

Quanika works with customers to transcend the challenges of accumulated complexity, simplifying systems and making them easier to control, to operate and to adapt.

Building performance through strategic partnerships

We work with systems integrators, consultants, and end user enterprises globally to leverage strategic partnerships with best-in-class tech vendors, including Axis Communications, HID, Mercury and Milestone.

Quanika's technology is available through open distribution, is easy to access and easy to work with. Our positive, can-do approach, and our 24/7 tech support, will help you build your future.

Our unrivalled experience of enterprise-wide systems integration brings together physical and logical systems, including access control, video, site safety, visitor management, and core corporate functions, to deliver optimum efficiency and value, letting you meet tomorrow's challenges, today.

Our solutions let you eliminate the inefficiencies of siloed systems and deliver insight and control, for lasting advantages.

The Quanika team will work with you creatively, to identify and solve your unique system challenges.

We deliver the most efficient solutions, ensuring secure and productive connections between people, physical infrastructure and corporate systems.

OUR MISSION, OUR VALUES, OUR PROMISE:

Quanika's mission is to deliver on the true promise of integration, giving our customers the powerful but affordable solutions, they need to protect themselves, and to prosper.

Our success is built on making that vision a reality for all our customers and fulfilling that promise.

Collaboration

We work closely, respond quickly, and succeed together.

Knowledge

Real-world insights and experience drive all our innovations.

Creativity

We pride ourselves in providing creative, logical, elegant solutions.

Satisfaction

We look for the best in everything we do, and find satisfaction in success.

Global Reach

We are dedicated to serving local markets, with a global reach.

TAKE ADVANTAGE OF THE VERY LATEST INTEGRATED SECURITY MANAGEMENT SOFTWARE

Unlock the value of IP Integration

As never before, Quanika delivers on the promise of affordable integration.

Whatever size your operation, Quanika Compact gives you the most capable, open architecture software solution available today.

It combines enterprise-level access control functionality with the power of video surveillance, and gives you unlimited integration possibilities.

Quanika works with industry leading hardware and software that involves minimal PoE cabling, making deployment easy. And as your needs change, scaling and migrating to new systems is affordable and convenient.

For small businesses, Quanika Compact improves efficiency and reduces risks.

Compact gives you control of events and alarms with visual verification. Issue credential driven access with ID for staff and contractors; automate and enhance their visitor experience; and respond to events more quickly – all with detailed activity audit trails and video evidence.

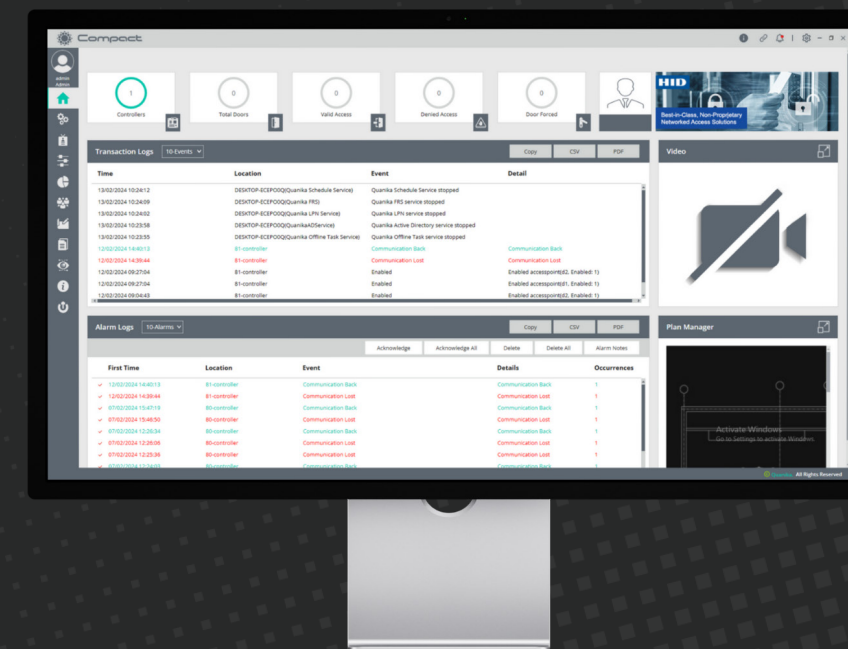

For mid-sized applications, Quanika can integrate both security and building management systems, driving efficiency across entire facilities. It's easy to create a centralised monitoring environment and that gives a complete view through video, intruder, fire and events from all devices and systems, map views, and more.

The result: greater control and a faster response

Despite the hype around the possibilities of IP-based technology, many businesses still rely on siloed security systems that use proprietary protocols. This means increased risk due to limited control and visibility, operational inefficiencies and a limited ability to scale and adapt.

In short, integration is hampered by slow moving technology partnerships or expensive and complex customisation, which is out of reach of most organisations.

But not with **Quanika**.

SCALABLE SOLUTIONS, TAILORED TO THE NEEDS OF EVERY SITE

Secure your facility, your way

Quanika Compact lets you grow at your own pace – but, at the same time, it gives you the powerful video and access features usually only available to enterprise businesses with large budgets.

Up to 128x
Door connections

Up to 128x
Camera connections

Unlimited
Cardholders

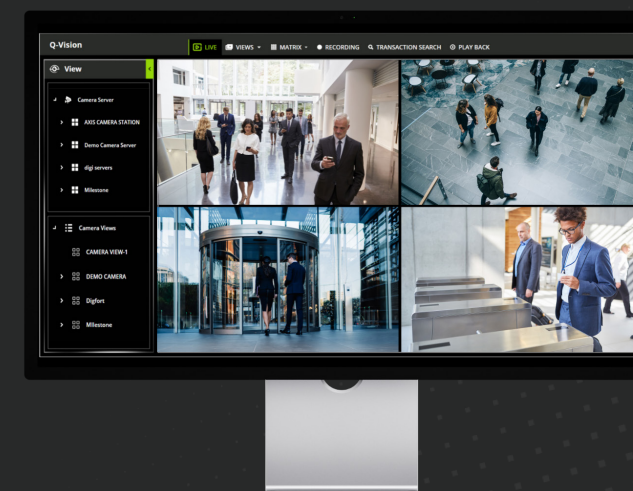

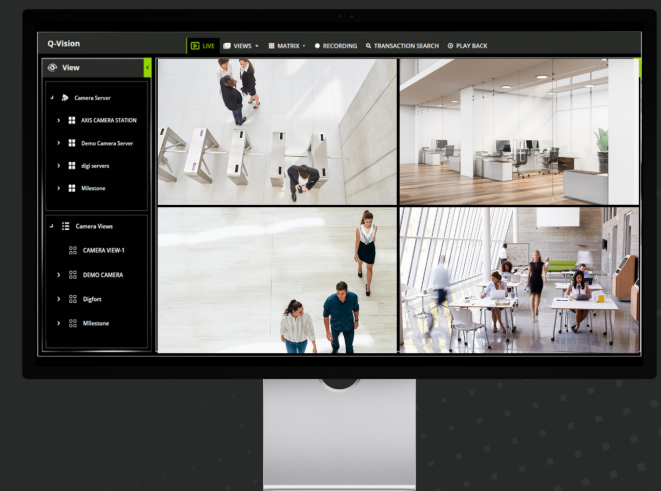

Unlimited
Credentials per
Cardholder

Entry Level Systems

Conventional integrated systems are best suited to large applications with hundreds of doors and cameras, yet the vast majority of installations are much smaller.

Quanika recognises this, allowing you to start from 3 doors and camera connections with the option to integrate up to 128x of each, and the flexibility to bolt on intercom and intruder systems – yet you only pay for what you need with additional Time, Attendance and Mustering reporting

Mid Sized Systems

With Compact you benefit from surveillance and control of your entire facility, from internal areas right out to the perimeter and even across multiple sites.

Enhance your customer experience by automating visitor management and take advantage of big data intelligence from video analytics. Quanika increases operational efficiencies and reduces risk by adding ID badge software, controlling elevator access and integrating fire, heating and ventilation systems on one platform.

Seamless Integration, Enhanced Security

Open IP architecture saves time and money compared to traditional proprietary setups, giving the freedom to choose the right mix of equipment to meet your needs now, and in the future.

An efficient way to secure your facilities, the controllers high performance processing power and storage make them fast and stable, so you are absolutely sure that only people who have permission are able to enter your premises.

Powered by IP

Compact is a futureproof and easily scalable system supporting fast and affordable deployment of a wide range of hardware options, with intuitive and simple, customisable user interfaces.

Integrated with best-in-class hardware from Mercury, HID, Axis and more, which allow credentials stored directly on to controllers, to enable flexible offline mode functionality.

Advanced Access Management

Readers and Door Stations

Users have a choice of RFID readers and intercom devices from multiple vendors that combines high-quality audio, 24/7 video identification, remote entry control and smartphone integration.

Seamlessly integrated with best-in-class manufacturers

and more.

FLEXIBLE, HIGH PERFORMANCE ACCESS CONTROL

GIVING YOU THE FREEDOM TO CHOOSE THE RIGHT MIX OF HARDWARE.

Put an end to siloed systems, inefficiencies, and uncertain outcomes, meeting your security, safety, and operational challenges with clarity.

Anticipate change, pivot fast, and speed up detection, verification, and responses, from day-to-day events through to full-scale emergencies.

Mitigate risk and increase control

room efficiency by managing multiple systems from an intuitive, unified platform to initiate fast and appropriate responses to ensure better outcomes.

Manage, verify, monitor, and control the smooth and efficient movement of staff, contractors, and visitors across single or multiple sites, leveraging modules for guard patrols, time and attendance, and mustering.

VMS INTEGRATION: THE RIGHT CHOICE FOR SCALABLE VIDEO CAPABILITY.

Easy and Efficient Surveillance

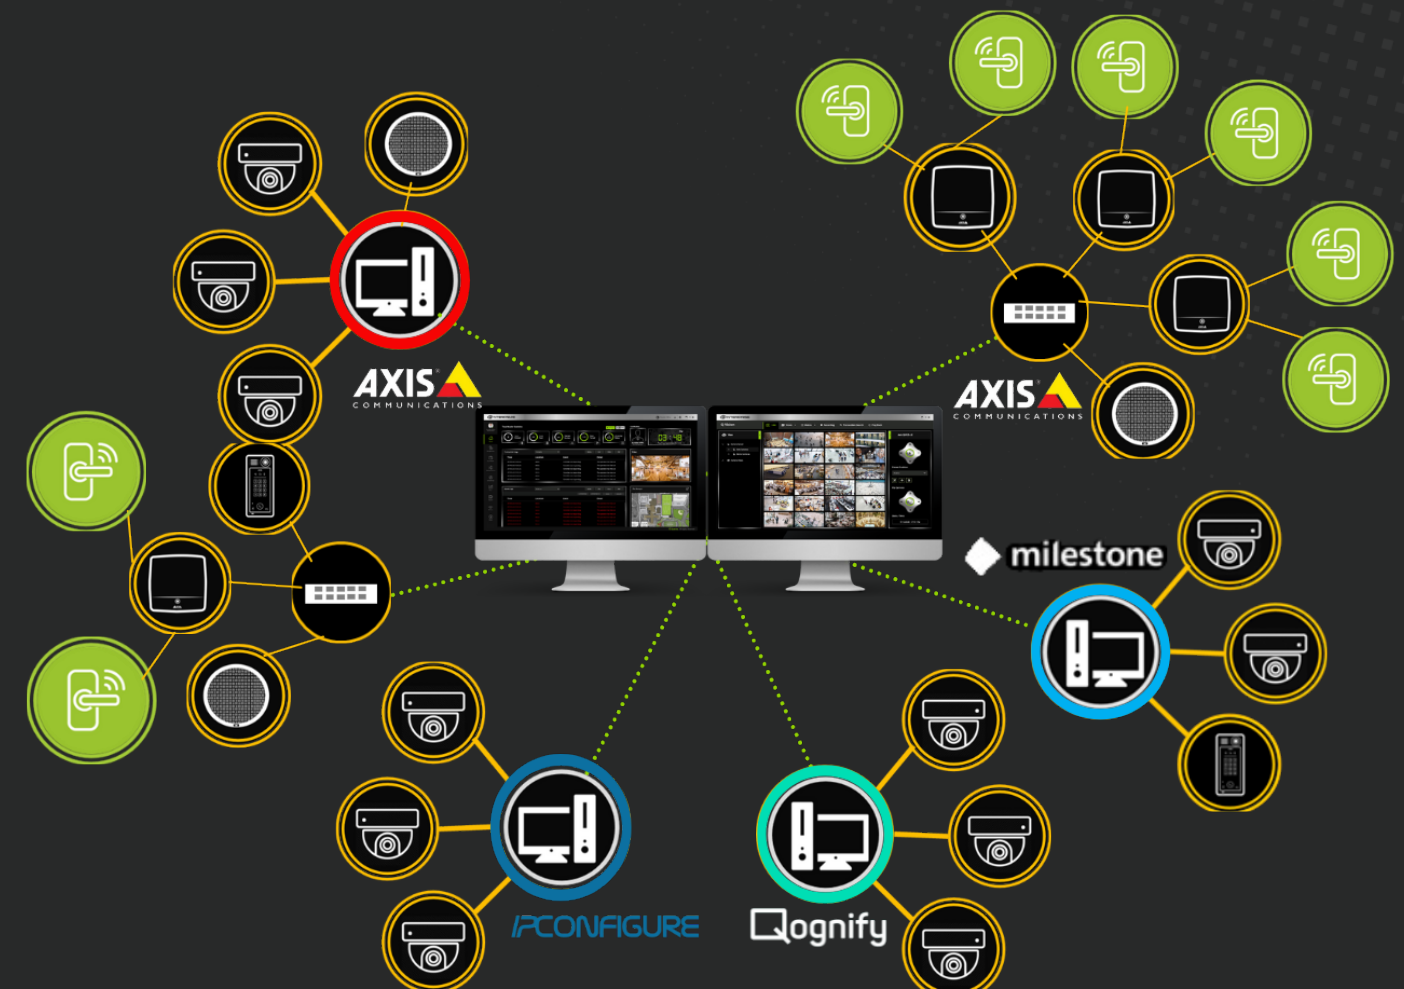

Quanika Compact seamlessly integrates to multiple industry leading manufacturers with Video Management Systems such as Axis, Milestone, Qognify, Digifort, IP Configure and more.

Quanika now enables multiple connections, making it easy to manage more network cameras and devices across large or multiple locations from one simple user interface.

For corporate enterprises and the most demanding sites, customers can opt to use a combination of Multiple VMS manufacturers, enabling a more affordable and modular approach to video management.

This cost-effective hybrid model lets you benefit from the power of VMS enterprise level functionality for specific sites or camera streams - for example using video analytics.

Integrated with best-in-class VMS:

SEAMLESS SYSTEM FUNCTIONALITY FOR THE WIDEST RANGE OF APPLICATIONS AND SECTORS.

Quanika Compact lets you achieve perfect, seamless functionality for all your site security, safety, and operations requirements - making it the definitive choice for a wide range of applications. Our solution not only addresses the priority challenges which, today, are faced by all major organisations, it can also be easily adapted, scaled and customised to meet your own site specific needs, case by case, location by location.

Healthcare

Make it easy for medical teams to work flexibly by enabling efficient staffing allocation with pre-authorised car parking and access to clinics and hospitals and their associated IT networks via QR codes and touchless self-service kiosks and tablets, allowing healthcare providers to adapt to clinical demand day by day.

Retail

Enable efficient centralised control as well as distributed and simple in-store management, with complete intruder, fire, and point of safety integration to allow remote and efficient video-verified investigations into access events, fraud, shrinkage, and health & safety incidents.

Multi-tenanted buildings

Optimise building usage with occupancy monitoring and integration with BMS, segregate databases and customise operations for each tenant to allow seamless access and enhance front of house and FM services to improve customer satisfaction.

Hotels & Hospitality

Complete, seamless integration of front and back of house operations incorporating Oracle OPERA, Assa Abloy wireless locks, and building management systems giving operators the ability to manage, monitor and control devices from a single platform and ensure a smoother and more welcoming guest experience.

Transportation

Streamline operations by remotely managing time and attendance with mobile apps, enable frictionless and secure access with touchless biometrics, pre-empt threats with big data intelligence, verify and re-validate permits to work, and restrict access with timed alerts to significantly boost efficiency and reduce operating costs.

Logistics

Secure supply chains, improve health and safety, and ensure full oversight of operations through systems integration allowing smart, automated control at every stage to improve customer service and boost efficiency with analytics-driven video, automatic license plate verification for vehicle movement and the tracking of goods in and out.

Commercial offices

Optimise workspace and improve employee productivity and visitor experiences by automating and managing an unlimited number of cardholders from a single interface to flexibly control access to facilities for staff, contractors, and visitors across multiple and international locations.

Quanika

One Platform,
Multiple Solutions,
Unlimited Possibilities.

Why Quanika?

Working for major corporate enterprises globally, Quanika operates at the forefront of systems integration, developing the most capable, open architecture software solutions available today.

Whatever size your operation, whatever challenges you face, we'll strengthen your business with all the advanced capabilities you most need, seamlessly and affordably.

Quanika works with industry-best technology leaders to deliver high-level control, as never before.

We strip away the complexity and deliver on the promise of affordable integration.
