

## 2N IP Intercom & Door Entry

# Wembley Park: 2N IP Intercom & Door Entry Systems

Currently undergoing major regeneration, London's iconic Wembley Park is the site of the outstanding new residential and leisure development - North West Village - and, at its heart, Emerald Gardens, a new complex of luxury 1, 2 and 3 bedroom apartments.

Location: **Wembley Park, London**

Client: **Quintain**

Supplier: **Hesis**

### Client:

Currently undergoing major regeneration, London's iconic Wembley Park is the site of the outstanding new residential and leisure development - North West Village - and, at its heart, Emerald Gardens, a new complex of luxury 1, 2 and 3 bedroom apartments.

Offering over 450 private apartments within 7 stylish buildings and set in almost an acre of city central grounds, Emerald Gardens is set to be one of London's most desirable modern-day residential areas.

### CIE & Norbain partnership delivers:

In order to achieve a flexible and secure door entry and resident intercom system, security specialists Hesis called upon the expertise of Norbain and 2N supply partners CIE to specify and deliver a solution which would meet the needs and high expectations of the development's highly discerning client base.

The recently-formed Norbain / CIE supply partnership brings together a combined team of security experts and system architects to provide consultation, specification and onsite support for the very latest IP-connected access control, intercom and AV integration to its customers - and the team more than delivered in designing and supplying for this high-profile development project.

CIE's in-house system architects specified 2N's top of the range IP Verso modular intercom system for door entry to each of the seven buildings, combined with the innovative 2N Indoor Touch device to be featured within each of the 450+ apartments of phase 1 of this development.

The 2N IP Verso Door Intercoms are positioned at each of the four main access points per building, providing residents and staff with secure, hassle-free door entry via a choice of contactless RFID keyfob or keypad entry code. Each of the 2N Verso Intercom devices also features full HD colour camera and integrated microphone allowing high resolution audio and video communication between visitors, residents and security/concierge staff.

The 2N Indoor Touch IP Intercom InterfaceThe 2N Verso IP intercoms provide live communication to each apartment within the Emerald Gardens complex via 2N's Indoor Touch - a stylish touch screen video intercom device which provides live video and audio communication to the Verso external intercoms, as well as allowing apartment-to-apartment calls.

Using a highly intuitive user interface, the 2N Indoor Touch provides residents with 2-way communication with visitors to the external entrances (main lobby, garden entrance, car park, etc) before allowing remote access simply by touching the screen.

Residents also have access, via the 2N Indoor Touch, to concierge services, 'Doorbell Snapshot facility' (a stored image library of any missed visitors who called), video & voice messaging and a library of apartment information documents, manuals, etc.

Bringing technology to life.

# Wembley Park: 2N IP Intercom & Door Entry Systems

Currently undergoing major regeneration, London's iconic Wembley Park is the site of the outstanding new residential and leisure development - North West Village - and, at its heart, Emerald Gardens, a new complex of luxury 1, 2 and 3 bedroom apartments.

## Why did the customer choose the 2N Intercom / Door Entry System?

Co-ordinating the project system specification, CIE's Kevin Sherwood explained "Wembley Park will be an iconic redevelopment for the Capital, so ensuring the system met the high expectations of both client and residents was key to project success.

"Therefore, the client's decision to choose the 2N solution was based not only on innovative product, but equally important was the level of service and support we were able to jointly provide as part of the new supply partnership with Norbain. Pooling the skills and resources of CIE, Norbain and 2N's experts, we have been able to deliver an exceptional level of support, from initial specification, right through to project implementation and moving forward into future stages of the development."

"The 2N IP control software was also custom adapted to support full connectivity with the development's Enterprise Management Server, enhancing the total solution environment."

## What is the 2N Indoor Touch?

Indoor Touch is 2N's latest luxury door communication system for use as part of a remote communication and door entry system.

The stylish and elegant Indoor Touch user interface allows 2-way communication with IP door intercom systems, VoIP telephones/ videophones, or other Indoor Touch devices on the same network, simply at the touch of an on-screen button. The device/control system will also allow for integration with other third-party IP controlled devices to provide remote, touch-screen control of building management systems such as lighting, heating, curtains, etc.

The 2N Indoor Touch is available in both black and white finish.

## Product:

- 474 x 2N Indoor Touch Touchscreen Intercom Device
- 28 x 2N 9155101C IP Verso Modular Door Intercom Basic Unit with camera
- 28 x 2N 9155031 IP Verso Keypad Module
- 28 x RFID Card Reader (customer supplied, housed within Verso devices)
- 28 x 2N 9155023 Verso Cover Box for 3 Modules - surface installation frame
- 1 x Grandstream GXV3275 Multimedia IP telephone with 7 inch touch screen
- 1 x NetStar IPBS Server

## Products used in this project

2N Indoor Touch  
Touchscreen Digital  
Intercom

2N IP Verso Door Intercom  
- Keypad Module

2N IP Verso Modular Door  
Intercom Basic Unit with  
Camera

Grandstream - GXV3275  
Multimedia IP telephone  
with 7 inch touch screen,  
Android, Wifi, PoE

## Let the CIE expert team help with your next AV project

CIE AV Solutions is one of the UK's leading value-added distributors, supporting our customers and their clients with product specification, system design and product supply for AV, intercom and electronics. Our in-house AV experts would be happy to advise on your next project or simply discuss your needs. Contact the CIE team on
