

**Leading access control,
security & AV distribution**

Distribution you can depend on

CIE Group is a UK-based distributor specialising in access control, intercom, security, and public address solutions for professional installers, integrators, consultants, and end users.

Partnering with some of the most respected manufacturers in the industry, we offer more than just distribution. Providing expert system design support, technical guidance, and ongoing assistance to ensure every project is delivered reliably.

CIE Group: More than distribution – a partner in smarter security

What truly sets CIE Group apart is the depth of expertise behind the products and brands.

Customers gain direct access to in-house technical specialists who understand real-world challenges and provide practical, project-led support. Whether it's recommending the right technology, resolving on-site issues, optimising system performance or delivering award winning training. By combining carefully selected, best-in-class technologies with hands-on technical support, CIE enables customers to deliver smarter, more secure, and future-ready solutions

We're a distributor that genuinely understands the demands of modern security and access control projects.

Solutions We Deliver:

Intercom

Award-winning IP intercom and door entry system design service

Access Control

Design and supply of everything you need for access control systems

IP Video Surveillance

Make sure everything's captured with a bespoke surveillance solution

Lockdown Systems

Strong, secure lockdown systems for offices, venues and schools.

Public Address

Complete public address systems for widescale announcements

EN54

Ensure safety with our EN54-certified voice alarm and public address systems

AV Rack Build

Complete public address systems for widescale announcements

Assistive Hearing Systems

Support improved communication for those with hearing impairments

Smart Home Automation

Create intelligent, connected living spaces, integrating lighting, audio and security.

Conference Systems

Designed for use in meeting rooms, boardrooms and large-scale conferences.

Akuvox

Akuvox is a global innovator in smart intercom and access control technology, delivering advanced IP-based solutions designed for modern residential and commercial environments.

By combining cutting-edge communication systems with AI-powered features such as facial recognition and intelligent access management, Akuvox creates secure, user-friendly entry solutions that integrate seamlessly with today's connected buildings. From reliable everyday door entry systems to sophisticated smart intercom panels, Akuvox continues to redefine how people manage access, communication, and security.

IP Door Intercoms

Intercom systems for secure high-quality communications.

IP Answering Panels

Luxury audio and video door intercom answering panels that fit into every interior.

IP Access Readers

Professional-grade products for both commercial and residential access control.

IP Telephones

VoIP technology for transmitting telephone calls over an IP network.

2N

Founded in the Czech Republic, 2N is a globally recognised manufacturer of premium IP intercoms, access control systems, and integrated security solutions.

Known for combining innovative design with robust engineering, 2N develops smart communication and access technologies that enhance security and convenience. Their innovative solutions are trusted in residential buildings, commercial offices and large-scale developments worldwide. They are designed to integrate seamlessly with third-party systems giving installers and integrators the flexibility to create reliable, future-ready access and communication solutions.

IP Door Intercoms

Intercom systems for secure high definition communications.

IP Access Readers

Professional-grade products for both commercial and residential applications.

IP Answering Panels

Luxury audio and video door intercom answering panels designed to fit into every interior.

Wavelynx

Wavelynx is a leader in modern access control, trusted for its commitment to open, mobile first identity solutions.

Their technology helps organisations move beyond legacy systems, making access faster, smarter and more intuitive. At the core of their portfolio are interoperable readers, controllers and mobile credentials all designed to integrate smoothly with modern security standards. This open architecture approach is their standout strength, giving businesses the freedom to modernise at their own pace without being locked into a single ecosystem. The result is flexible, future proof security that adapts as your needs evolve.

IP Access Readers

Automatically paired readers and credentials - without worrying about configuration or encoding.

Smartphone ID Readers

Smartphone ID solution consisting of a smartphone wallet app, mobile and physical credentials.

IP Door Intercoms

Intercom systems for secure high-quality communications.

SAFR

SAFR is a global leader in advanced, privacy-first facial recognition technology. Powered by its own advanced AI and built on more than 30 years of RealNetworks innovation.

Designed for real world environments, SAFR delivers industry leading accuracy, rapid recognition speeds, and exceptionally low bias to ensure a reliable performance. Their unified facial recognition ecosystem is a key differentiator. It provides a single, scalable platform that integrates seamlessly with access control systems, VMS platforms, and third party cameras to deliver centralised identity management and real time intelligence.

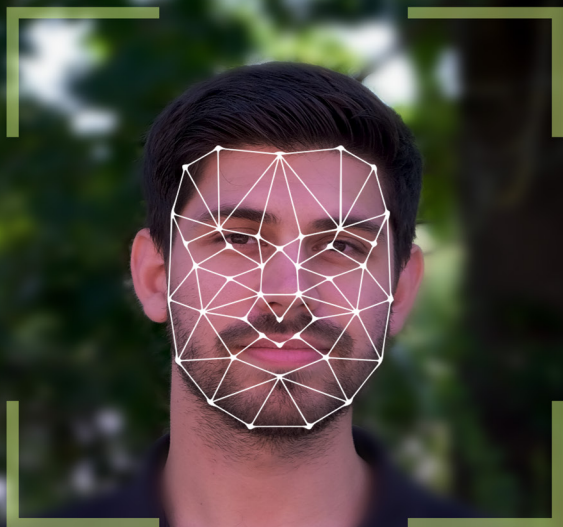

Face-recognition access readers

High-speed access and authentication, harnessing the very latest in biometric credentials.

IP Access Readers

Automatically paired readers and credentials - without worrying about configuration or encoding.

STid

STid is a leading provider of high-security access control and identification solutions, specialising in innovative contactless technologies.

The company designs advanced RFID, mobile and Bluetooth-enabled systems that support organisations securely manage access to buildings, assets and sensitive data. With a strong focus on openness, interoperability and user experience, STid develops scalable readers, credentials and mobile access solutions that integrate seamlessly with modern security infrastructures, enabling businesses and institutions to protect people, spaces and information with confidence.

IP Access Readers

Automatically paired readers and credentials - without worrying about configuration or encoding.

Smartphone ID Readers

A wide range of upgradeable readers, compliant with all RFID MIFARE chips and NFC mobile credentials.

ATEX Certified Readers

ATEX & IECEx certified proximity and long range readers for applications in explosive environments.

Hands-free & Vehicle Access

Long-range readers & credentials for driver and vehicle identification and access control.

Salto Systems

Salto Systems is a global leader in smart access control, known for transforming how organisations secure and manage their spaces.

Their solutions replace traditional keys with flexible, wire-free electronic access. They are supported by advanced platforms such as the Salto Virtual Network and the cloud-based Salto KS. Together, these deliver real-time control and a seamless user experience.

Door Hardware

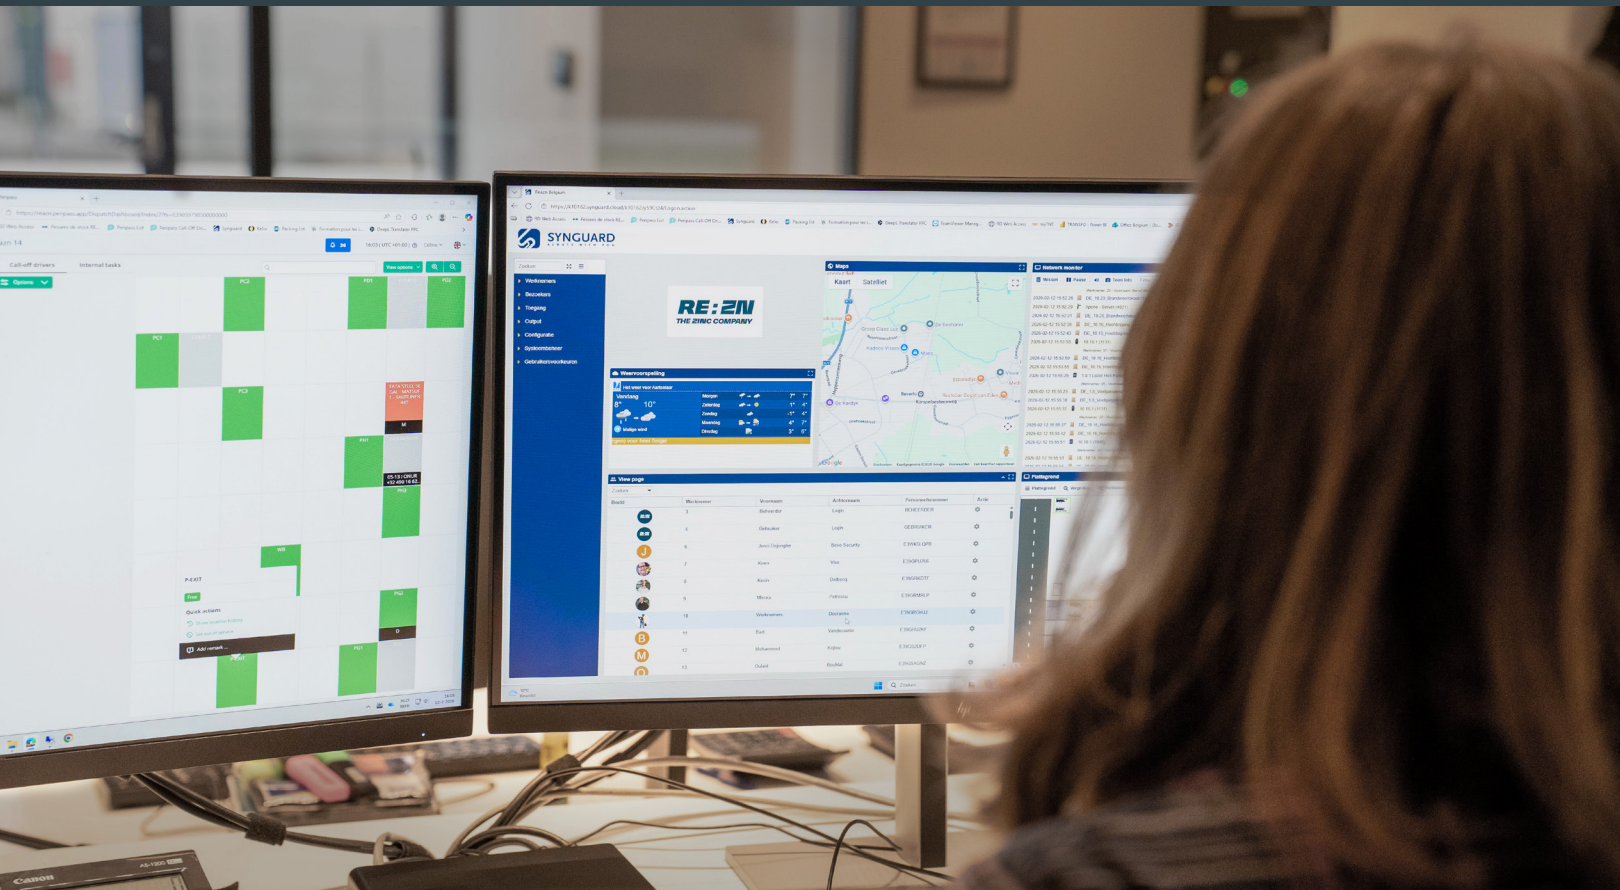

Range of door closers, locks, door furniture and emergency exit hardware for build longevity and compliance.

Electronic locking hardware

Transforms traditional doors into intelligent access points, combining sleek design with smart technology to deliver secure, keyless entry for modern spaces.

Synguard

Synguard is a European access-management specialist known for combining powerful technology with a genuinely customer-centred approach.

Based in Belgium, they develop all core software and intelligent hardware in-house, giving them full control over quality and innovation. Synguard's principal strength lies in its open management platform which unifies access control, visitor management, parking, lockers, lifts, CCTV and more into one intuitive web interface. This openness allows organisations to choose the technology partners they prefer, while Synguard ensures everything works seamlessly together. The result is a scalable, future-proof system trusted by businesses who value flexibility, integration and reliable support.

Parking Management

Real-time management and allocation of parking spaces for employees, visitors and partners.

Visitor Management

Streamlined visitor registration from pre-booking to on-site check-in, all managed in the same platform.

Unified Security Management

One platform integrating security, CCTV, lifts, lockers and more for efficient building management.

March Networks

March Networks is a global leader in intelligent video surveillance, trusted by organisations that need security they can rely on.

Their solutions turn traditional CCTV into a powerful source of insight, using AI driven analytics to help businesses reduce risk, improve operations and respond faster to events. Their enterprise platform links seamlessly with cloud services, business data and IoT devices transforming video from passive footage into real-time intelligence. The result is smarter, scalable surveillance designed for today's security challenges.

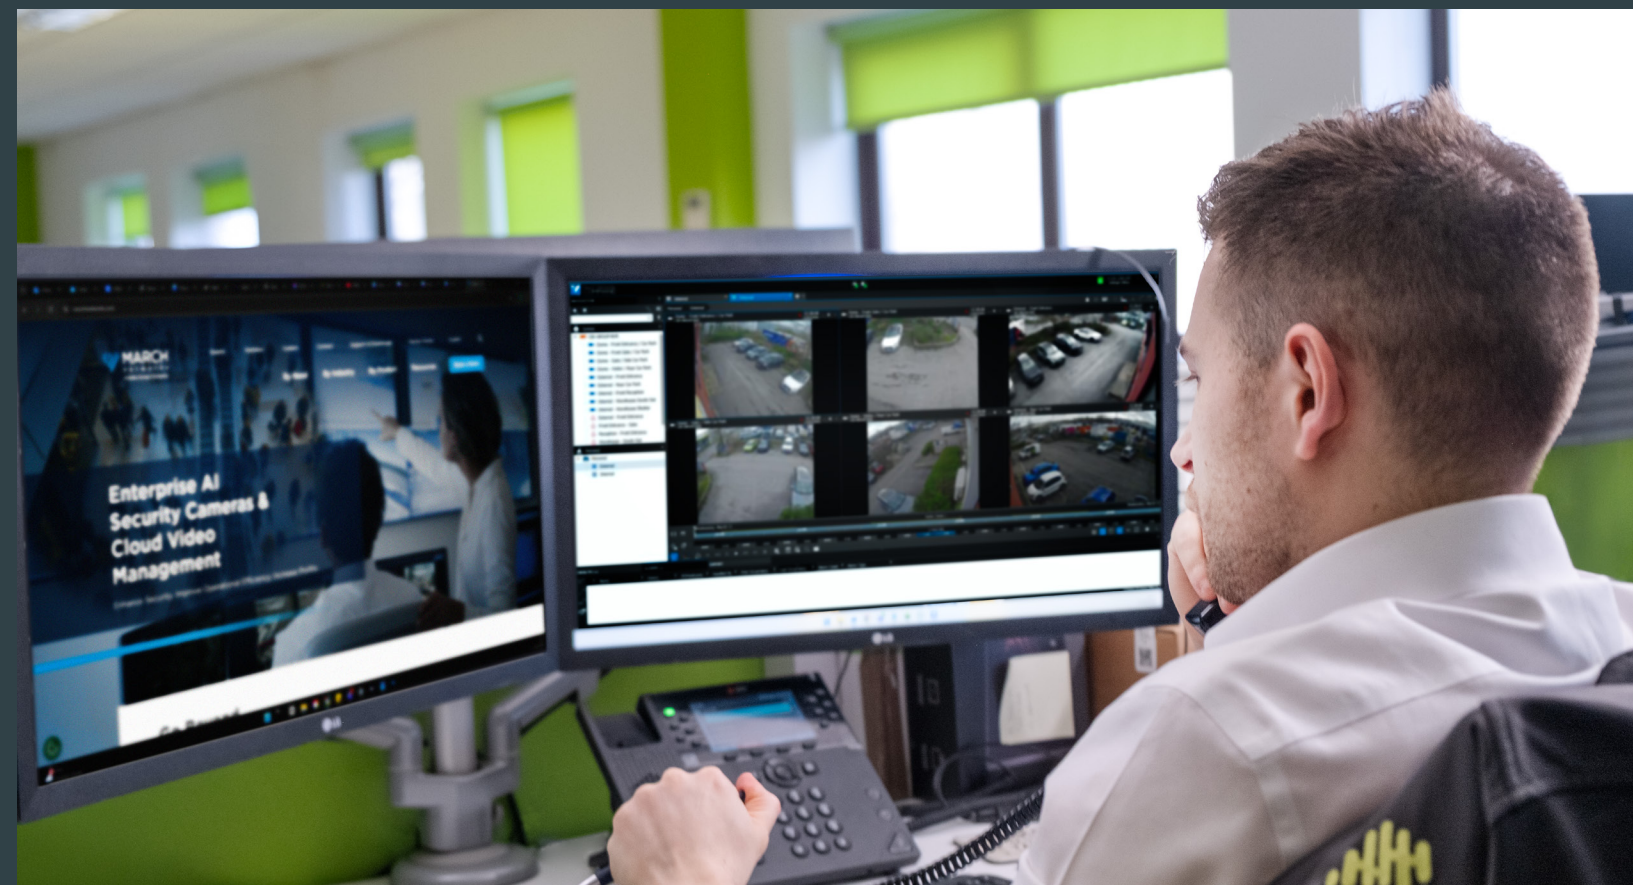

AI-Enabled IP Cameras

Intelligent video solutions powered by AI analytics.

Network Video Recorders

Hybrid and all-IP recorders, built for high-performance video capture.

Third Millenium

Third Millennium is a respected UK manufacturer of advanced access control readers, known for its strong heritage of innovation within the security industry.

Their portfolio includes RFID, PIN, biometric and multi-technology readers, all designed with a sleek, modern aesthetic and engineered to meet the needs of highly security-conscious organisations. As a trusted industry partner, they offer GovPass-compliant, high-security solutions ensuring seamless integration with a wide range of access control systems. Holding ISO 9001 and ISO/IEC 27001 certifications, they prioritise quality and security, delivering reliable and adaptable solutions tailored to each client.

IP Access Readers

Automatically paired readers and credentials - without worrying about configuration or encoding.

UK Manufactured

All Third Milenium access readers are fully UK designed and manufactured.

GovPass Compliant

GovPass certified readers approved for UK government access control.

Farpointe Data

Farpointe Data is a trusted global partner for premium RFID access control solutions, known for delivering reliable readers and credentials for professional security environments.

Since its founding, the brand has focused on delivering high-performance proximity, smartcard, long-range and mobile identification technologies. These solutions enable access control specialists to deploy secure, modern systems with confidence. Their standout offering is the CONEKT mobile access platform, which turns a smartphone into a secure credential. Farpointe Data is recognised for its precise design, strong build quality and broad compatibility. These strengths make it a trusted choice for organisations looking for reliable, future-focused access control solutions.

Smartphone ID Readers

Farpointe Data's mobile smartphone ID solution consists of a smartphone wallet app, mobile and physical credentials.

Long-range Receivers & Transmitters

Farpointe Data long-range receivers & transmitters offer exceptionally long transmission distances up to 61 metres (200ft).

Zenitel

Zenitel is a global leader in intelligent critical communication systems, trusted wherever clear, reliable communication is essential.

They specialise in solutions that ensure people can hear, be heard and be understood, every time and everywhere. Their portfolio spans IP intercoms, public address, voice alarm systems and network speakers, all designed to deliver exceptional audio quality in demanding environments. With more than a century of expertise behind them, they continue to set the standard for secure, high performance communication across safety, maritime, energy and transportation sectors.

IP Audio & Public Address

A complete range of professional public address & IP loudspeakers

Voice Evacuation

Modular design, built-in redundancy and great flexibility are key to the Zenitel range of EN54-certified voice evacuation systems.

IP Intercoms

Industrial-grade intercoms designed to resist high impact and extreme weather conditions.

Opus Technologies

Opus Technologies is a manufacturer specialising in innovative audio solutions that make public spaces more inclusive and accessible.

They design and build high-performance systems such as induction loop amplifiers, Auracast™ wireless solutions, UHF transmitters and window intercoms each engineered to deliver clear, reliable sound in challenging environments. With in-house design and manufacturing, Opus combines technical excellence with a strong focus on human connection, helping venues create welcoming, barrier-free experiences for all.

Hearing Loop Amplifiers

A wide range of professional, Class D Hearing Loop Amplifiers for installed assistive listening systems.

Portable Induction Loops

Portable induction loop systems for flexible assistive listening support where and when it's needed.

Window Intercom Systems

This system allow clear, two-way communication through barriers such as security screens.

Auracast Audio Broadcast

Aura by Opus wireless audio broadcast systems using the latest Bluetooth multicast technology.

interM

Inter-M

Inter-M is a global leader in professional audio, public address and network-based communication technology. Their products support reliable communication across sectors ranging from education to commercial and public-sector spaces.

Their standout strength is a scalable range of network-driven PA and audio-over-IP systems which provide high-quality audio and efficient multi-zone broadcasting for buildings of any size. Inter-M's decades of expertise, supported by in-house manufacturing, ensure clear sound, reliable performance and seamless system integration.

Audio-over-IP

Professional audio distribution over IP network for site-wide & multi-site systems.

Amplifiers

100V line and low impedance mixer and power amplifiers.

Processors & Mixers

Audio signal distribution and sound control for professional audio systems.

Loudspeakers

A wide range of professional loudspeakers for voice and music production.

CYP

CYP is a leading force in professional AV connectivity, known for designing and manufacturing cutting edge signal management and distribution solutions.

Their product range spans matrices, extenders, switchers, scalers and AV over IP systems. What sets CYP apart is their commitment to innovation, backed by in house engineering and a continually evolving product roadmap that delivers future ready performance. CYP combines dependable engineering with solid technical support, giving integrators the confidence to create smooth, high-quality AV installations.

AV Signal Distribution

Professional AV distribution products, such as matrices and switchers for multi-display installations.

IP Audio & Public Address

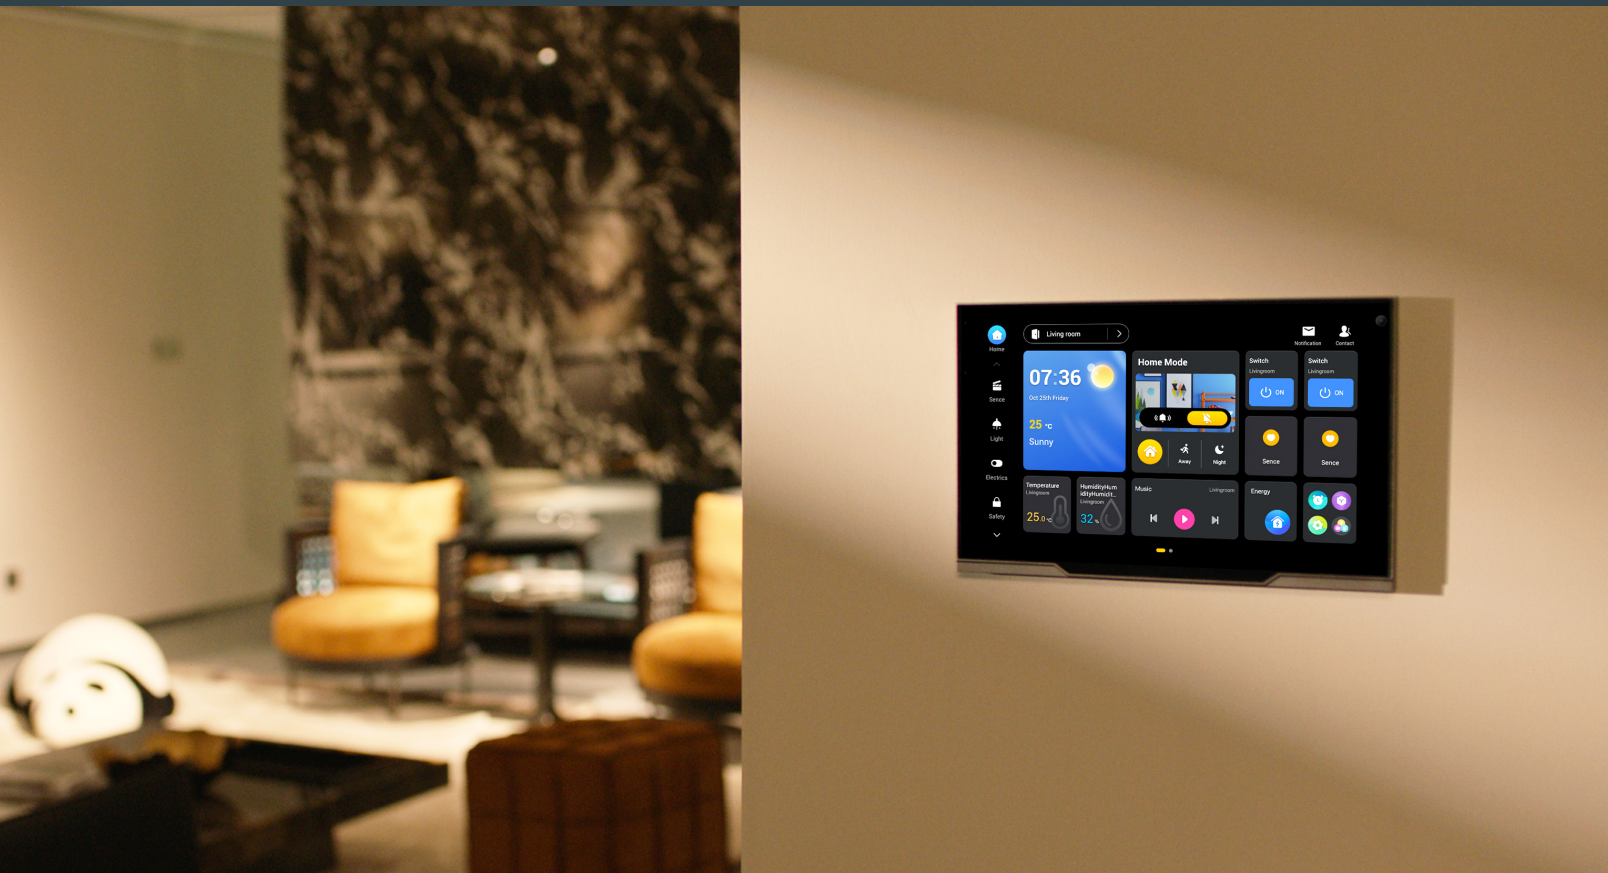

A complete range of professional public address & IP loudspeakers

AV Transmission Solutions

High-performance extenders, scalers and converters all designed to maintain high-quality video and audio over long distances and mixed formats.

akubela

akubela is a smart home brand from Akuvox, designed to bring comfort, security and seamless communication into modern living.

Their ecosystem centres around the HyPanel series, an elegant all-in-one control panel that unifies lighting, climate, entry and security into one intuitive interface. akubela stands out by focusing on truly connected family living, combining smart automation with features like in-home intercom, remote access and personalised scenes. With KNX, Zigbee and other standards onboard, it fits homes of any size and creates a smart living experience that's seamless, secure and intuitive.

Integrated Home Automation

Unifies lighting, climate and security with personalised automations

Smart Home Panels

HyPanel combines control, intercom, sensors and gateway functions in one device control into a single elegant interface

Multi-Protocol Integration

Supports KNX, Zigbee, Matter and more, unifying devices into one smart ecosystem.

So much more than your average Security supplier!

Whether you're planning a new project, reviewing your access control or security strategy, or simply want to explore the latest technologies on the market, CIE Group is here to help.

From system design and product selection to technical support and ongoing partnership, our team works alongside you to deliver solutions that work — now and into the future.
