

Axis offers high-quality, all-in-one network audio solution.

Creates ambience for maximized in-store experience

"Shoppers make more impulsive purchases when they're overstimulated."

What kind of music do you currently play in the store?
How would you adjust the music and promotion messages in different times in a day?

Ensure optimal communication mix with targeted music and announcements.

Engages audience with the right message

New technologies enable broadcasting different messages and music to single or multiple zone(s), live or by pre-recording.

Whether it is a school, a factory, or a hospital, the all-in-one audio system not only improves administrative efficiency, it also enables better communication with centralized or personalized message with just a click.

Instant audio alarms like digital "guard dog"

With integration of video and sound together, your premises will be protected with alarm notification and announcements when an intruder has been detected.

Audio systems are included as part of the safety and security system. You can now act promptly like a real guard dog!

Proven cases with Axis audio systems

**“The city is making an important investment.”
Óscar Sumonte, Mayor of the City of Concón.**

Axis solution assists to alert individuals in emergencies of natural catastrophe and crimes.

The solution consisted of AXIS P5635-E Network Cameras and AXIS C3003-E Network Speakers.

Dubai Autism Center

Dubai Autism Center moved to a new four story facility and were on the lookout for an audio solution for general announcements, paging and for emergency drills. The solution operates as both a single and segmented unit; playing music in the guest lobby or making announcements directed at staff moving around in the building.

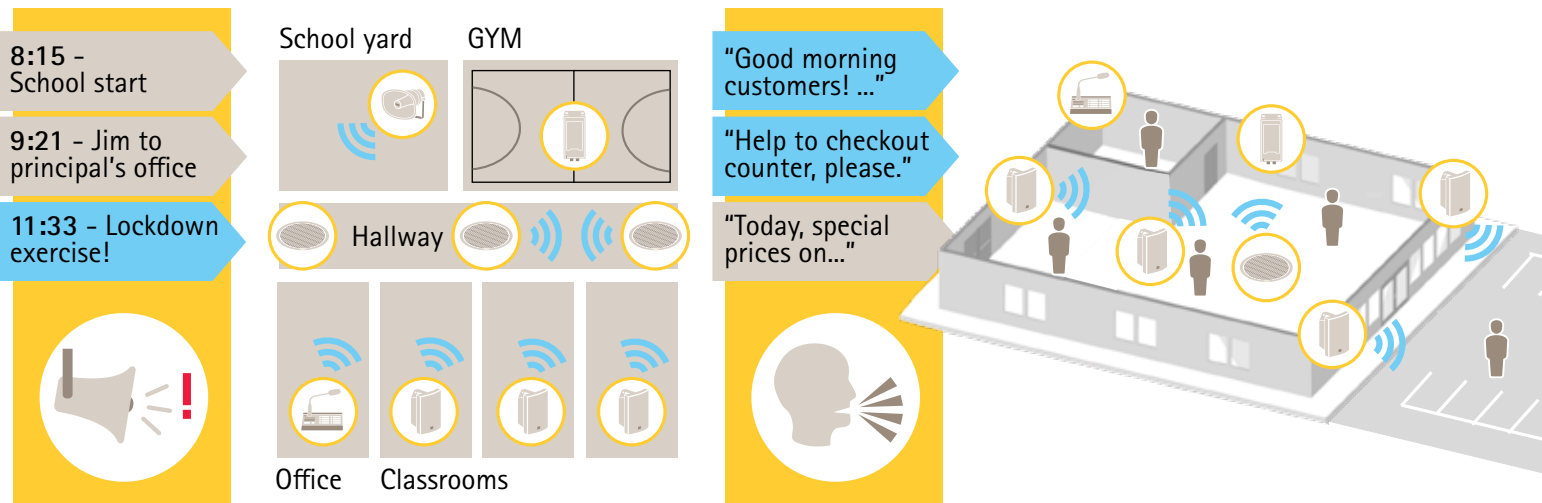

Deter intruders in outdoor perimeter areas

Multiple manufacturing factories and data centers in Asia integrated AXIS C3003-E Network Horn Speaker to its perimeter protection solution from Axis. Whenever suspects are detected as loitering or crossing a pre-determined area, operators receive a notification and can quickly verify the conditions of the intrusion, and then use the mic and speakers to make announcements to warn and deter unwanted activities.

Make use of the audio systems at campus and retail stores

Engage people with centralized announcements or customize personal messages to the right audiences at the right place.

Play the promotional audio clips on your preferred time and right zone.
