

Intelligent audio.

Deliver high-quality background music and clear speech announcements with Axis network audio solutions.

Why network audio?

- > **All-in-one** - everything you need is built-in so there's no need for additional hardware
- > **Easy to integrate** - an open platform allows you to integrate with systems and devices on your existing network
- > **Central control** - manage the entire system from a single, intuitive interface
- > **Scalable** - flexible, cost-effective to update and add to your solution
- > **Easy to install** - all you need is a single standard network cable for connectivity, power & communication

Intelligent audio solutions
